

CANVAS GEARBOX

SAFETY & EASE WHILST TRUCKING...

cubed³
ENGINEERING INNOVATION

THE ISSUE

Canvases are readily used by the trucking world to cover their loads whilst transporting.

However the ease of putting on these canvases and removing them has always been a hassle and can be a hazard for operators. All workplaces have a Health & Safety responsibility to implement fall prevention measures.

THE SOLUTION

The Canvas Gearbox is designed to easily attach onto a shaft and allows operators to open and close canvases on top of trucks, all while the operator is safely on the ground.

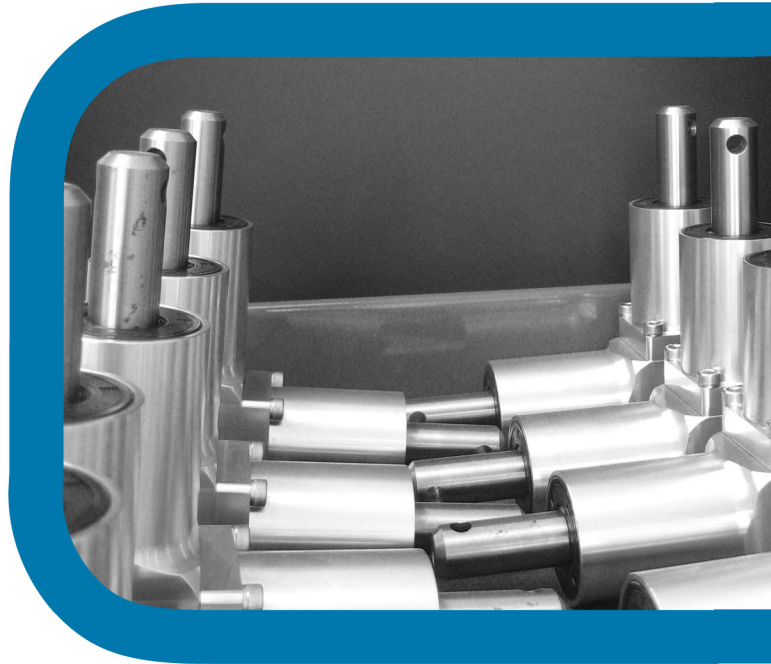

Prevent falls and Health and Safety penalties.

SPECS

The 'Canvas Gearboxes' are:

- Fully enclosed with grease for life.
- There is NO maintenance required.
- Stainless fasteners and fittings
- Light weight with an aluminium housing
- Very reliable!

The 'Canvas Gearbox' are competitively priced and New Zealand made.
